Open letter to the members,

It has come to the attention of the majority of the landowners that Dennis Greany is no longer fit to be the chairman of the board or for that matter to be on the board. He has constantly went against the will of the majority landowners on every issue that has arisen. In meetings he talks down to landowners, lie to their face, instead of answering the questions that are asked. He has failed to show how money has been spent via canceled checks. Instead he introduced a ridiculous budget that is not at all the will of the people. The people only want the road fixed and the budget is \$23000.00 on things that are not needed by anyone, unless you are a corrupt person. Dennis is trying to make this a big city corporation that has millions of dollars to waste, landowners are not a big city. His agenda is all about making the value of his property go up at the expense of all the landowners. Dennis has expressed on many occasions that is all he cares about and this proves you he self-absorbed in his agenda and not what the community wants. He has caused nothing but a greater divide within the community and therefor it would be best if he would resign and turn over the board to people have the interest of the community in mind.

Dennis should be aware that there are greater things involved than just him, if the sad story about his time in the Marines was true then he would know that. I spent 22 years in the Marine Corps, I learned self-sacrifice for the greater good, its quite obvious Dennis has no idea what that means. Maybe if he would review the 14 leadership traits and the leadership principles he might understand why the majority wants you out, he might even be a better person.

I know Dennis took the time to bash me and my service in his letter, and that is okay, cause anyone that has ever known me and read it know that he is a bald face lier when it comes to that.. I have more esprit-de-corps in my pinky finger than he will ever have in his entire body.

So Dennis, do yourself a favor, resign, turn over everything to someone that cares about the community.

Respectfully,

Mark Belew
